

MySQL Installation

1. Run the below commands install Mysql

(either use sudo or login as root)

```
sudo yum install mysql-server
sudo /sbin/chkconfig --levels 235 mysqld on
sudo service mysqld start
sudo mysql_secure_installation
```

after running secure installation command set the root password for mysql.

To verify the installation run the below command

```
mysql -u root -p
```

2. To set remote login follow the below steps

```
vi /etc/my.cnf
# add the below line
bind-address=192.168.112.161(your current ip or hostname)
```

Login mysql as root and create one remote user

```
mysql>> create user 'dstream'@'192.168.112.161' identified by 'dstream';
mysql>> grant all privileges on *.* to 'dstream'@'192.168.112.161' with grant
option;
mysql>> flush privileges;
mysql>> flush hosts;
```

To verify login with below command

```
mysql -u dstream -h 192.168.112.161 -p
```
